

PARK PET SHOP'S
CARE SHEET FOR
Seachem's **aquavetro** product line

eight.four

Use this product to increase your pH and alkalinity. In cases where calcium and alkalinity are ideal, but pH is still low, then use **balance**.

Otherwise, use **balance**.

To move p.H. up .1unit(s) add 1 inner cap of **balance** to 20 gallons of water.

vibrance

Daily add 1ml to 25 gal to sustain a reading (8 hours later) of .06 - .08
Test 1 x per week to assure dosing is accurate.

Ions

1 cap to 35 gal. 2 x's per week (typically raises Magnesium level by 5 mg/L) and adjust amount so that the weekly test reads 1200-1350mg/L

Variable is great. Do not exceed 7 x's dose in one day!

Calcification

test to see if level is from (380-400) – if not, then 1 inner cap to 25 gal raises calcium by 10mg/L.

Do not exceed 3x's dose in one day!

Depending on depletion, you may need to test daily, weekly, bi-monthly etc...

alpha

Water conditioner if using tap water.

Great product for 911 on toxic ammonia or nitrite or nitrate.

fuel

Shake well. 1 inner cap per 30 gal 2x's a week. You may need more depending on coral growth.
